Omnia Range

Our Omnia Range submersible pumps are low head filter pumps with integral self-cleaning intake filters. They have a maximum output of 220 litres/minute and pressure of 1.1 bar. These pumps that can be fitted with 60 µm, 115 µm, 300 µm, 1mm or 2mm mesh on the self-cleaning intake.

Their ease of use, low maintenance and combination of intake filtration and pumping makes them ideal for dirty water use. They are all single phase and the O2008-16 model has an 110v motor option.

Ideal Filterpumps for Analysers
Omnia pumps are used extensively as sample pumps for water quality monitoring and are ideal for open loop heat pump systems.

Key Features
✓ Removes suspended solids down to 60 microns
✓ Pump and self-cleaning filter in one unit
✓ Ease of installation
✓ High reliability and easy to use
✓ 11 metre maximum head
✓ 220 litres per minute maximum flow
✓ Reduced capital, installation and maintenance costs
✓ All stainless steel including impellers
The Omnia Range submersible pumps with self cleaning intake can be fitted with a 60, 115, 300, micron aperture nylon screens, and 1mm, 2mm or 3mm woven stainless steel mesh.

The filter mesh is made up of strong bias-cut nylon mesh inserts for ease of maintenance. The inserts are inexpensive and easy to replace.

Sintered stainless steel mesh is also available in 50, 100 and 315 microns.

**Construction**

- Filter screen area: 525 cm²
- Screen sizes standard: 60, 115 and 300 micron available
- Screen material: Standard is nylon mesh in polypropylene insert, sintered stainless steel is also available
- Impeller extension shaft: Acetal
- Impeller: 304 Stainless Steel
- Rotor: Acetal
- Rotor Bearings: Silicon Carbide / Acetal
- Filter cage: AISI 304
